Marvel movie collection dvds

(Image credit: Marvel Studios) Netflix used to have a lot of Marvel movies, but then Disney Plus appeared and snatched more than a dozen of these movies faster than Thanos can break his fingers. So maybe you're wondering what's left? Unfortunately, the big red only has one MCU movie left, two more chapters that are pretty darn good too. We are so eager to see them again ourselves, so we have already looked them up for you. Netflix's top 56 series are Our Picks for the Best StreamingTrying Devices to find out in what order to watch the entire MCU movie? We have them sorted by release date and film timeline in our way of watching Marvel films in order guide. Ant-man and the Wasp (2018)(Image credit: Marvel Studios/Disney)PG-13/1h 58minSituatd strangely at the MCU, many may have skipped Ant-man and the wasp while waiting for Avengers: Endgame (which is on Disney Plus). These people missed out, however, as Paul Rudd's return to ant man costume proved for a solid fun action romp, with a good dose of feeling healthy. I'm not going to spoil what happens, but let's just say we learn a little more from the history of the Pym family. Randall Park stole scenes like FBI agent Jimmy Woo.Watch now on NetflixToday's best Roku Streaming Stick Plus deals, Marvel Studios, you'll be watching Marvel movies until you die, and they'll keep going long after. The fun of investing in the Marvel Cinematic Universe, which ends its long phase three with The Avengers of April: Endgame, is that all this is just a long story in progress: That these universes are connected. It's a space opera forever. It's a perpetual franchise. Marvel has not confirmed its entire future calendar, other than a vague calendar with terms like Untitled Marvel Movie 8 scheduled for July 2022. But there are many rumors, and even some directors and confirmed characters. All these movies are exciting. But how exciting? Today, we rank all of marvel's confirmed and semi-confirmed films, for how excitement we are (and you have to be) to watch them. For what it's worth, we're including sony films (which own Spider-Man and occasionally borrow MCU stars like Iron Man) and Fox X-Men films (which haven't crossed with Marvel yet, but might someday) as part of the Marvel family, even if they're not technically part of the Marvel Cinematic Universe. Advertising – Continue reading below 14. Gambit (March 2020) Be worried about this one. Channing Tatum plays Gambit, a former Louisiana thief with the power to manipulate kinetic energy. Great, right? I guess. But the film has been a disaster from the start, with three different directors attached and then leaving the project, from Rupert Wyatt up Doug Liman to Gore Verbinski. He has also apparently gone from a heist film to a romantic comedy (with the great Lizzy Caplan as Gambit foil). But he hasn't started shooting yet, and he hasn't a director yet. At last, Tatum himself talked about directing it. direct it, to see if this one even happens. 13. X-Men: Dark Phoenix (June 2019) The X-Men have had a rocky path from it lately, with X-Men: Apocalypse a little groaner (and directed by Bryan Singer, which is surely done with these now) and its biggest moment of recent years mocks Deadpool 2. They have brought back the crew to follow the release of Jean Grey from the Phoenix, one of the most powerful characters in the comics. One has to wonder how much longer they're going to keep this going, with actors like Jennifer Lawrence, Michael Fassbender and James McVoy clearly ready to move on, and the franchise woke up in the shadow of Deadpool. Focusing an entire film on a minor character from now on seems like his own risk. Expect X-Men: Deadpool (or vice versa) as soon as they can to get the contracts worked. 12. Venom 2 (TBD) The first film was a great success, which disguised the fact that it was a total disaster, almost from the outset. (This film is basically a series of plot holes with occasional CGI explosions.) But Tom Hardy had a certain lunatic energy like Venom, and when one film makes as much money as that, there will definitely be another. Maybe they'll take a little longer getting the details right on this one, or, if that doesn't happen, they'll just let Hardy go crazy. That would be nice, too. 11. Doctor Strange 2 (2021) The first film was funny, if not particularly inspired; Do you even remember anything about Rachel McAdams' character? We could argue that Doctor Strange was more fun in infinite warfare than in his own film. Director Scott Derrickson will return for this one, and we will confess, we enjoy the American accent of Benedict Cumberbatch ... but this feels a little minor for us. 10. The New Mutants (August 2019) This is where the exit ramp might be for the X-Men franchise: These new mutants, focusing on teenage mutants with incredible powers being held in a facility against their will. If this is the big hit Fox hopes it will be, they won't have to worry about Lawrence and Fassbender and the crew: They'll have their own new franchise to build around. Director Josh Boone meets his teens; He directed The Fault in Their Stars, after all. We're not sure we need another X-Men franchise, but the new blood can't help but inject some life into the company. 9. Black Widow (2020) No, it won't be the Saturday Night Live version of the story, but it will happen: Scarlett Johannsen signed a \$15 million deal to play the character in a solo film, directed by Cate Shortland (Berlin Syndrome, Lore). The most intriguing rumor about Black Widow is that it will qualify R, which would be the first Marvel Cinematic Universe film to receive the rating. 8. Guardians of the 3 (TBD) After the controversy over writer-director James Gunn pulled him from the project, the third Galaxy film backed down, but they're still planning to do so, and perhaps even using Gunn's already finished script. (Although it will not be the camera.) These characters are still great company, but you can't help but wonder if he'll lose something without the teacher who made it all happen. Either way: We are still angry with Peter Quill over infinite warfare. What was that, buddy? 7. Shang-Chi (TBD) Announced last month, Shang-Chi is the first Marvel film with an Asian lead, based on a character trained in martial arts and confronting his own family demons. The film is being written by Dave Callaham, who also wrote the upcoming sequel to Spider-Man: Into the Spider-Verse, as well as writing the sequel to Wonder Woman. The time seems right for this, and is clearly in the right hands. 6. The Eternals (2020) The first great tentpole of Phase Four of the MCU, The Eternals are a gang of other mundane beings who have superhumans, well, everything: less Hawkeye, more Thanos. This is believed to be an important project, the linchpin of the next phase, but perhaps we're more excited because of the deputy director: Chloe Zhao, who made amazing 2018 The Rider, a film that would look as different from a massive company like this as humanly possible. 5. Captain Marvel (March 2019) The first Marvel film to focus solely on a female lead —the only thing DC beat them—Captain Marvel stars Brie Larsen as a former Air Force pilot whose DNA merges with a kree warrior in an accident and ends up turning her into a galactic superhero. You may remember Captain Marvel's call in infinite war closing credits, connecting the two Avengers films, but the timeline takes place in the '90s, which means you can probably expect plenty of Snapple and rappers with high hair. 4. Spider-Man: Far From Home (July 2019) Spider-Man: Homecoming was Spider-Man's funniest movie in a decade... at least until spider-man: in the spider verse occurred. Tom Holland has revitalized the character in the public consciousness, and the result (aided by a great villain played by Michael Keaton and a global and adolescent environment) was an explosion. The sequel features a school trip to Europe and a bad boy named Mysterio, played by Jake Gyllenhaal. Spider-Man fatigue is natural at this point, but director Jon Watts kept things moving the first time, and he's back for this one. We're not tired of Spidey yet. 3. Black Panther 2 The most blockbuster Marvel film ever – and the third-most blockbuster film of all time — is obviously going to the top of the list of emotions, and even though it will lose its incredible villain Killmonger, Wakanda and its people have an endless number of stories to tell us. Ryan Coogler has signed on to direct the sequel, so we're already in: Heck, you might be the first one by end up winning best film, after all. And you never know: Maybe they can find a place for Michael B. Jordan after all. 2. Spider-Man: In spider-verse 2 (2020) This is surely not what will be said, but if you have seen the original fantastic, you know there is no limit to the number of that could come from it. Surely we'll get a Noir Spider-Man, and Spider-Woman, and maybe even a Spider-Ham movie at some point, but this one will surely focus on Miles Morales, the hero of the first film. Over time they will dilute the grandee of the first film, and it will be a bumper. But right now: We want as many of these movies as they're going to give us. 1. Avengers: Endgame (April 2019) This is the big one, the second half of the epic, lighting up the cliff of (spoilers? guessing?) of Thanos that fits half of the universe out of existence. How do they all come back? Are they all coming back? How do they handle Thanos? And perhaps most fascinatingly: Which heroes, original Avengers, are being removed from the franchise. Is this for Captain America? Iron Man? Nick Fury? More than a decade of film value have specifically led to this one. Anything that comes next will be a reaction to it. It's the biggest yet, and perhaps the greatest ever. Grierson & amp; amp; Leitch writes about the films regularly and host a podcast in the film. Follow them on Twitter or visit their site.
